

A photograph of a modern food court interior. On the left, a station is labeled "THE GROVE GRILL". In the center, a large, multi-tiered oven unit is labeled "THE BRICK OVEN". The oven has a logo for "SMART MOUTH" with the tagline "Choose Your Fuel". The food court has a clean, industrial design with stainless steel counters and red accents. The background shows a red ceiling and a white wall.

# MULTITERIA ADVANTAGE

From concept to installation, we are  
with you every step of the way.

## Why Multiteria?

From the onset, Multiteria's vision has been to offer flexible, versatile, and durable serving lines. We can offer a custom look, without the custom price. In addition to the high quality and exceptional product design, Multiteria has in-house designers and engineers, ISO 9001 manufacturing powered by Lakeside in Milwaukee, WI, and available factory-tech installations.

## Predictable delivery based on acknowledged promise date.

We take pride in meeting every promised delivery date with precision and consistency. Our outstanding commitment to this comes from superior teamwork between our engineers, sales, customer service, and assembly teams—all working toward one unified goal: fulfilling your expectations. No matter if you serve in K-12, college and university, healthcare, casino, or corporate dining foodservice – We've got your project timelines covered!

Pam needed the serving lines quickly, so Multiteria's fast sales response and delivery saved the day.

## Incredible service with excellent communication every step of the way.

We deliver superior project management backed by a seamless process and clear communication. From defining your project goals to managing documentation, quoting, handling purchase orders, fostering collaboration with our factory, and providing post-delivery support, we're hands-on throughout your journey. You're more than just a client—your success is our mission! From concept to installation, we are with you every step of the way.

## Serving lines are designed for easy maintenance.

Easy repairs and maintenance built right in. Our serving counters are designed with operators in mind, featuring removable base panels. This thoughtful design ensures trouble-free access for repairs and maintenance, minimizing downtime and keeping operations running smoothly. Our innovative utility chase design conceals electrical cords securely, reducing clutter and eliminating tripping

hazards—saving you from potential injury costs from accidents. Designs that are made with operators in mind, blending functionality with necessity. Removable front panels also allow for easy remodel to change design themes without disrupting the lifetime frame.

## Highly customizable to fit any desired aesthetic.

From matching school or interior paint colors to designing customized countertop curves, we'll go above and beyond to create solutions that fit your distinct vision. Whether your project demands bold creativity or sleek simplicity, we deliver. Achieve the perfect combination of style, flexibility, and functionality with a customized design crafted just for you.

UW-Platteville required curved counters with quartz water fall edges, recessed trays, and packaged snack shelves to accompany a 75' Mongolian Grill station on a tight timeline. We delivered and helped the university boost revenue, employ 80 students, and serve 2,500 students daily in just 2.5 hours!

 *With our facilities, no place has more customization than we do... we have seen revenues increase since the remodel. I'm proud of the work [Multiteria] did. It looks great and has held up extremely well.*

Michael Ernst, Director of Auxiliary Services – UW-Platteville

## Lifetime warranty on frame.

Durability redefined. Our serving counters feature fully welded tubular stainless steel frames backed by a lifetime warranty. Sleep easy, knowing your investment is built to last with industry-leading toughness that ensures your operations run smoothly for the long-term. Multiteria's standard of quality provides you with sustainable, timeless reliability.

Cedarburg High School sought a durable, long-term solution that would not only encourage students to purchase meals but also create an environment that motivates staff productivity. Our Essence serving counters delivered on both fronts—standing up to the test of time and handling 400 to 500 meals daily. Even after three years of use, they remain as pristine as the day they were installed.

 *It's easier to attract staff when they come here for an interview and see this, rather than if they've gone to some place where it's out of date, not kept up, not clean, and not inviting.*

Laura Kalt, Director of Foodservice, Aramark

## Serving lines are designed to meet your specific needs.

Our serving lines combine sleek design with unparalleled flexibility and functionality. From stunning canopy designs that replace traditional ceiling soffits to vibrant, high-resolution customizable graphics, every detail is crafted to impress. Need versatility? Our food guards effortlessly transition from self-serve to full-serve with just one hand. The innovative Tight Link® Locking System allows you to connect multiple counters and easily move them to any location. Better yet, when the counters are connected, the Tight Link Locking System enables streamlined cord management. With updateable graphics, operator-focused features, and designs

that complement contemporary décor, our serving lines are built to adapt to your evolving needs—saving you both time and money by eliminating the need for costly replacements.

**Mt. Washington Middle School** wanted an easy way to deliver pre-portioned entrées, fruits, and vegetables to align with federal meal pattern requirements. The solution? Our configurable food guards. Designed for precision and simplicity, these food guards not only safeguard pre-portioned servings but also help staff consistently deliver the correct portion sizes – promoting healthy eating with every tray served.

*"The glass food guards allow students to view the product in the hot wells, but prevents them from reaching into the serving line area.*

Todd Crumbacker, Director of School Nutrition Services, Bulitt County Public Schools

Mt. Washington Middle School – Mt. Washington, Kentucky

## Create merchandisable retail concepts.

Keep students, staff, and visitors close by offering them irresistible on-site dining options that rival top retail chains. By turning your serving lines into merchandisable retail concepts, you can transform dining operations, boost participation, and drive revenue like never before. Keep meal dollars flowing inside your foodservice operation while promoting a vibrant, engaging dining experience.

New Berlin High School envisioned transforming their library into a modern, inviting space resembling the cozy, academic vibe of a posh bookstore or a college lounge. With the help of Multiteria, they brought that vision to life, creating an engaging and vibrant environment that mirrors popular retail concepts—designed to inspire and excite their students.

*We have a lot of coffee type items, along with some snacks, students can actually buy food and meals here... We are extremely happy with it.*

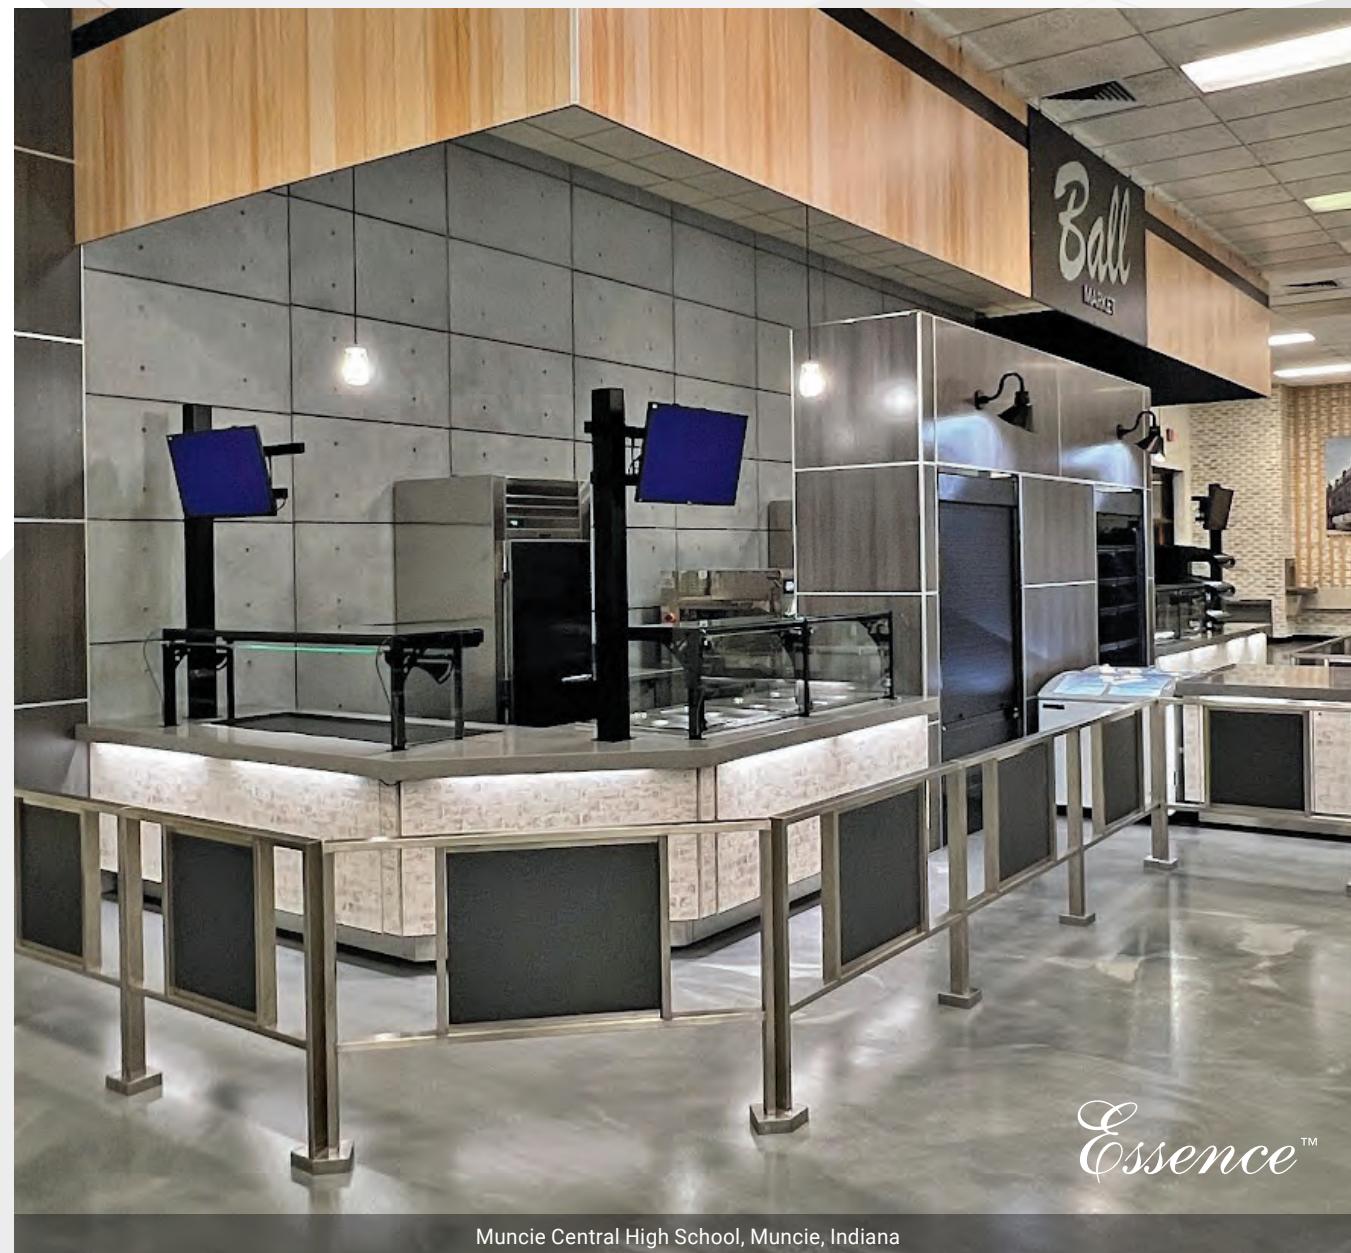

Cindy Jensen, Director of School Nutrition, School District of New Berlin

New Berlin High School Cafe, New Berlin, Wisconsin

## Custom look without the custom price.

Achieve a cohesive and distinct look without stretching your budget. Our customizable counters blend seamlessly into any décor, whether you're matching facility colors or creating a way to reflect school pride. Through close collaboration with our design partners, we bring the premium aesthetics of custom fabricators to your space without the premium cost. Multiteria can also create traffic railings that are an excellent alternative to retractable stop barriers.

## ADA Compliant serving lines take the guesswork out of facility adherence.

At Multiteria, inclusivity is at the heart of our designs. With ADA-compliant serving counters, we create easy access for all users. Our customizable counter heights (ranging from 32" to 36") prioritize operator and customer comfort, reducing strain during meal service while ensuring that everyone feels welcome. We take the guesswork out of compliance so that you can focus on what truly matters—serving your community.

## Fully welded stainless steel frame and stainless steel interior; durable, easy to clean.

Strength, durability, and hygiene—all in one. Our fully welded tubular stainless steel frames ensure that your counters are both robust and easy to maintain, especially when portability is critical. Extended posts support the heavy-duty performance of our food guards and tray slides, delivering unmatched functionality with a lifetime warranty on the frame.

Facebook, Hudson Hall Commons, New York. Three independent food cart designs emulate New York City's iconic food carts.

## Tight Link® Locking System provides unmatched flexibility when connecting multiple counters.

Our Tight Link Locking System takes the hassle out of connecting multiple serving counters. Its innovative design ensures sturdy and level foundation, with an expansive frame surface that keeps countertops perfectly aligned and securely connected. The seamless design eliminates unsightly gaps with a sleek flange, doing away

with the need for spacer bars. Plus, the open frame allows for unobstructed access, making it easy to run beverage lines or power cables without restrictions. It's the ultimate solution for operators looking for functionality and style in one unit.

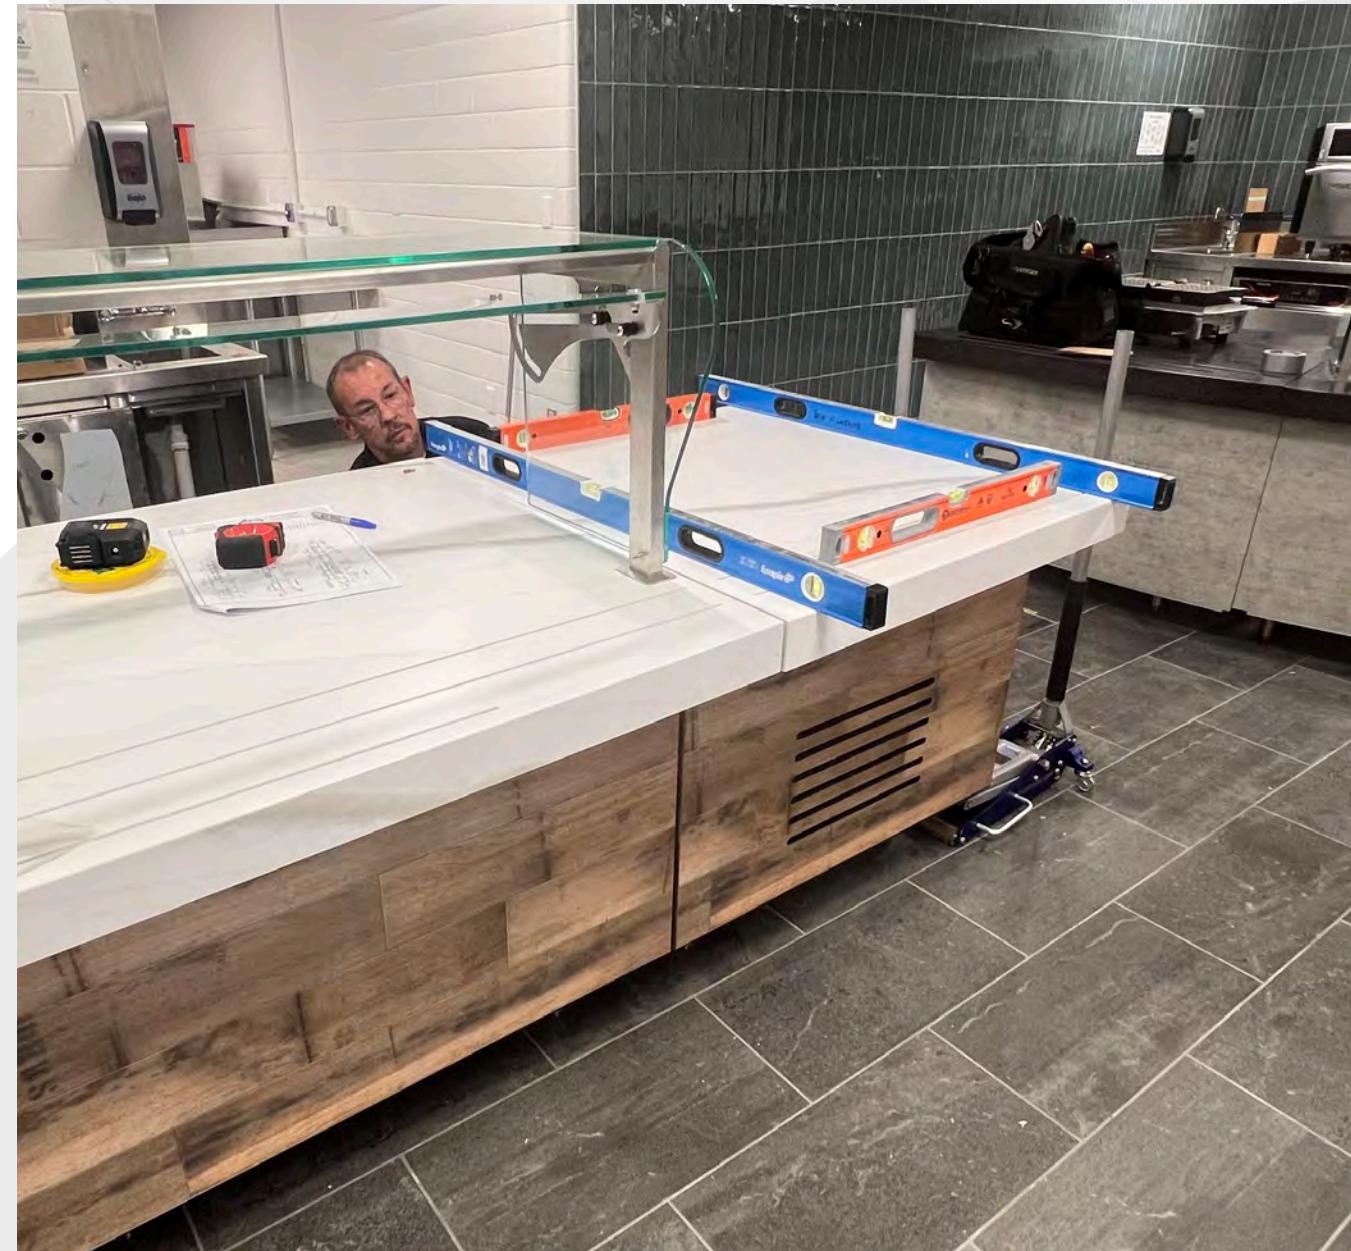

## Professional installation services tailored to your project.

Our installation services are designed to ensure precision and efficiency from start to finish. Our highly trained craftspeople assemble the entire line on the plant floor to assure fit and finish before shipping. Then your counters are blanket wrapped for protection and delivered with "A-Grade" quality at every step. Whether assisting the local team or handling the full installation, we specialize in services such as set-in-place installation, leveling,

and counter seaming for solid surface and quartz countertops. For more complex projects, we offer floor templates and precise onsite measurement support to guarantee perfect delivery. We are committed to completing your project with the highest quality and meticulous attention to detail.
